

## Mutations in the protein kinase A R1 $\alpha$ regulatory subunit cause familial cardiac myxomas and Carney complex

Mairead Casey, ... , Cynthia C. Morton, Craig T. Basson

*J Clin Invest.* 2001;**107**(2):235-235. <https://doi.org/10.1172/JCI10841C1>.

### Corrigendum

*J. Clin. Invest.*106:R31–R39 (2000) While our work was in preparation for submission, we were apprised of the fact that Stratakis et al. had independently reached a similar conclusion regarding the identification of mutations in the gene encoding PRKAR1 $\alpha$  in patients with Carney complex. These findings were subsequently published in. *Nat. Genet.*26:89–92 (2000).

## Mutations in the protein kinase A R1 $\alpha$ regulatory subunit cause familial cardiac myxomas and Carney complex

Mairead Casey, Carl J. Vaughan, Jie He, Cathy J. Hatcher, Jordan M. Winter, Stanislaw Weremowicz, Kate Montgomery, Raju Kucherlapati, Cynthia C. Morton and Craig T. Basson

*J. Clin. Invest.* **106**:R31–R38 (2000).

While our work was in preparation for submission, we were apprised of the fact that Stratakis et al. had independently reached a similar conclusion regarding the identification of mutations in the gene encoding *PRKAR1 $\alpha$*  in patients with Carney complex. These findings were subsequently published in *Nat. Genet.* **26**:89–92 (2000).
